

DataSurfer Modules: User Guide

12.11.2020

Web server deployment

1. Extract the **datasurfer.zip** archive.
2. Run the **start.bat** file.
3. The web server must be accessible on “**127.0.0.1:8069/**” by default.
4. Click sign in to log in.

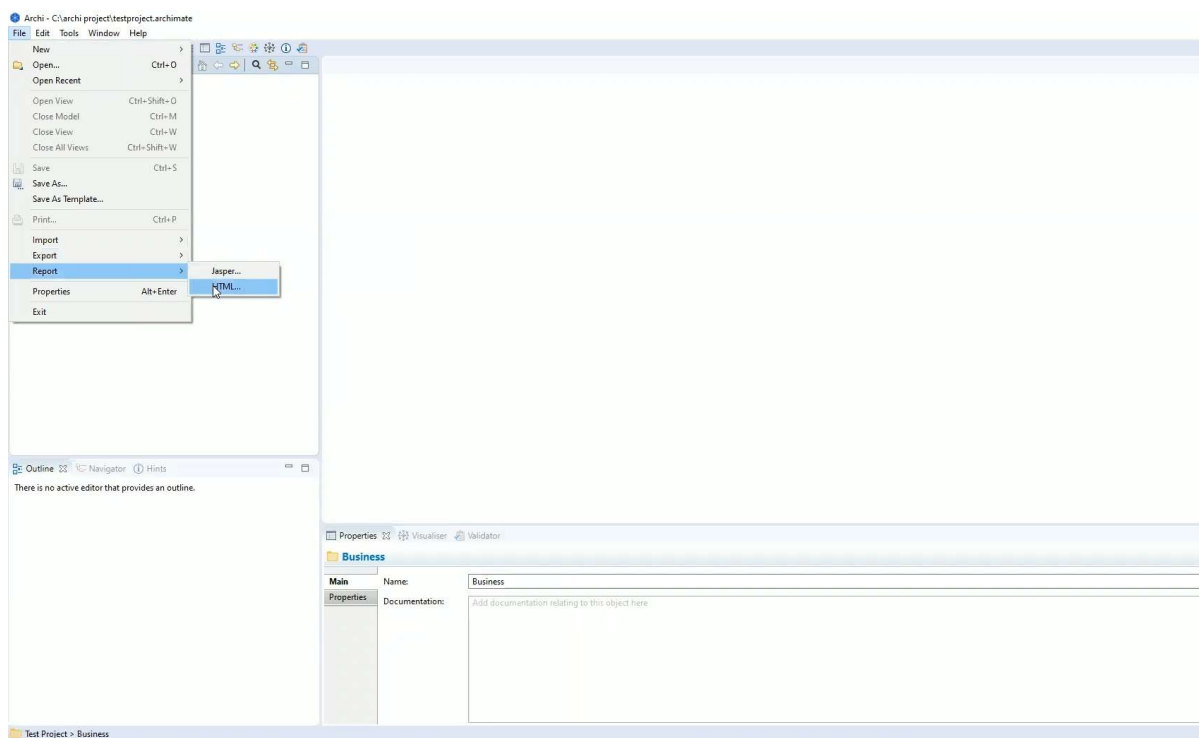

5. Type **admin** as the email and password.

Report Exporting (Archimate)

1. Create a folder with the name “reports”.
2. Open a project in Archimate.
3. Click File → Report → HTML...

Note: The project must be selected.

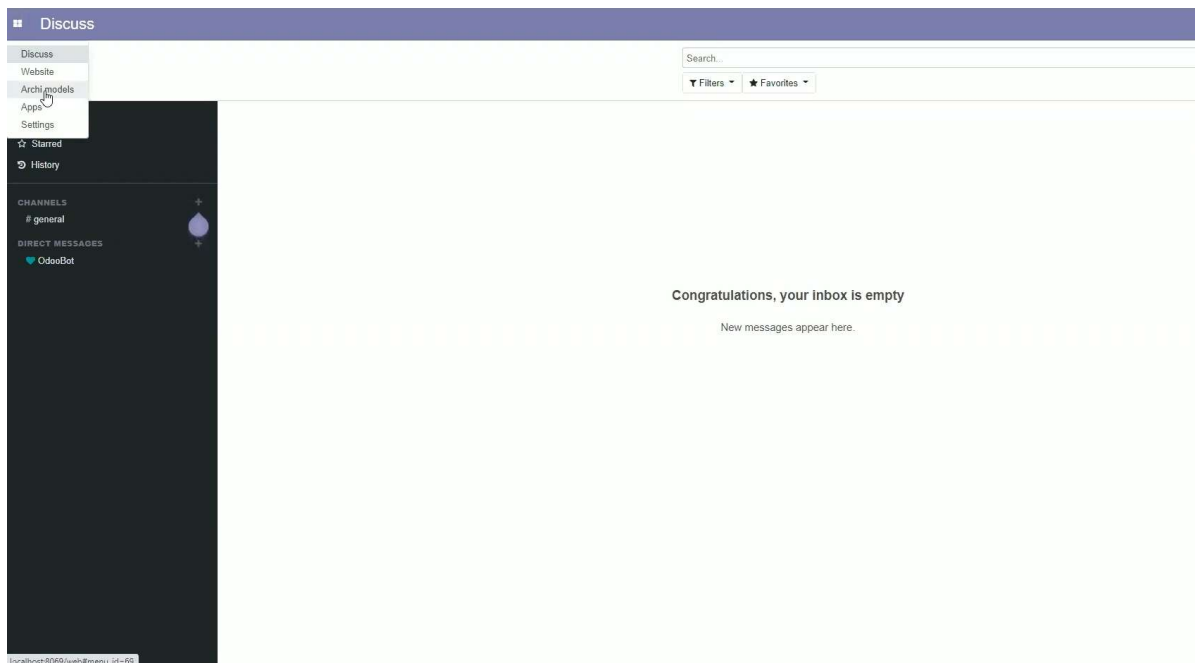

4. Select the previously created “reports” folder as the destination location.
5. Place the **reports** folder into a Zip archive.

Report Importing

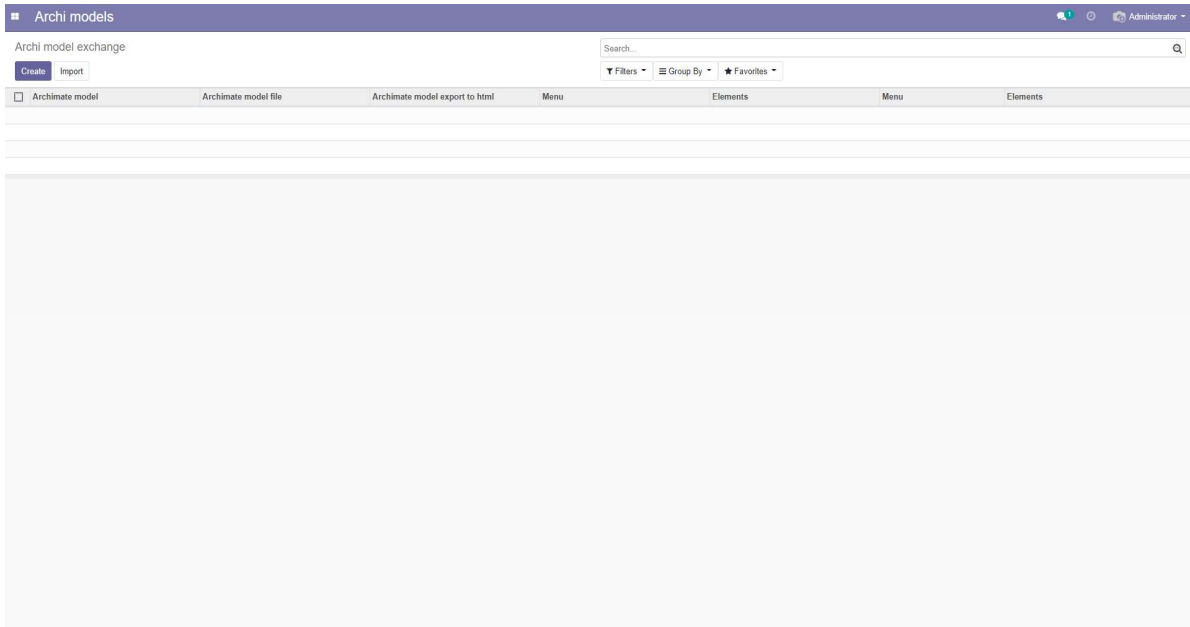

1. Open the Archi models web-server.

Note: The default path is “127.0.0.1:8069/”.

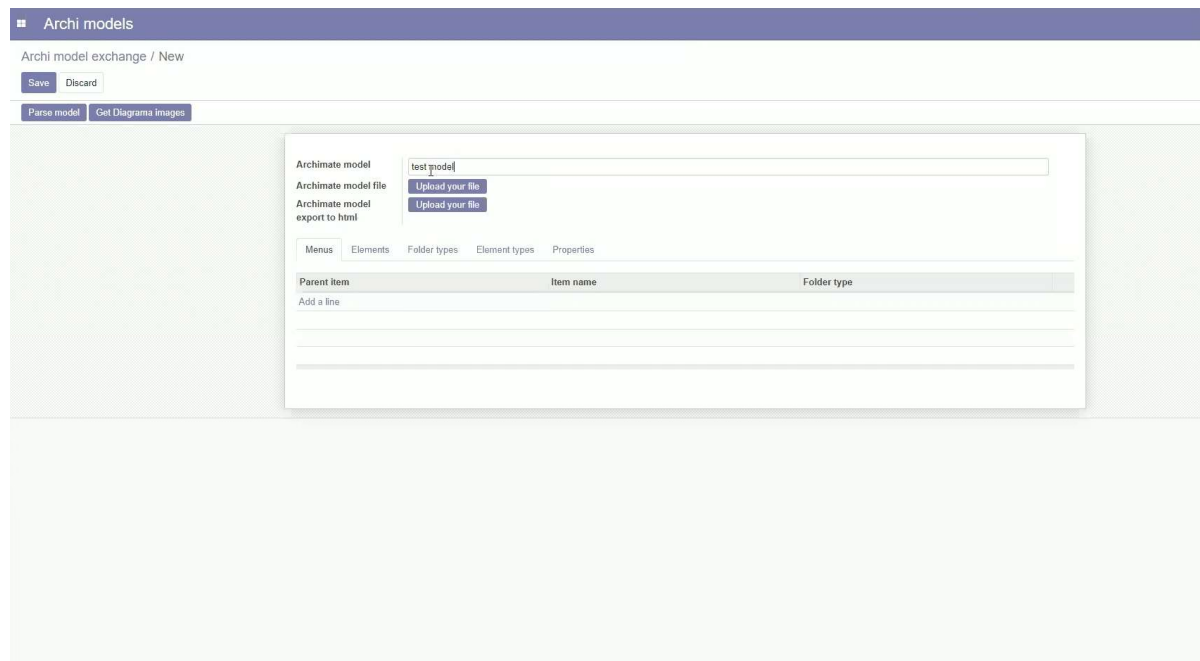

2. Go to the **Website** → **Archi models**.

3. Click the **Create** button.

4. Fill in the name of the model.

5. Click on the “Upload your file” button related to the “Archimate model file” field and upload the project file (“.archimate”).
